Editors

Professor Roland W. Lewis
School of Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK (*E-mail:* ijnmeuk@wiley.co.uk)

Professor Ted Belytschko
Department of Mechanical Engineering, Northwestern University
Evanston, IL 60208, USA (*E-mail:* ijnme-us@northwestern.edu)

Associate Editors

Professor René de Borst
Koiter Institute Delft, Delft University of Technology
P.O. Box 5058, NL-2600 GB Delft, The Netherlands
(*E-mail:* R.deBorst@tudelft.nl)

Professor Charbel Farhat
Department of Mechanical Engineering and Institute for Computational and Mathematical Engineering, Stanford University, Stanford,
CA 94305, USA (*E-mail:* cfarhat@stanford.edu)

Founding Editors

Professor O. C. Zienkiewicz
Department of Civil Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK

Professor R. H. Gallagher†

Editorial Board

J. S. Arora
University of Iowa,
Iowa City, USA

R. J. Astley
University of Southampton, UK

I. Babuska
University of Texas at Austin, USA

K. J. Bathe
MIT, Cambridge, MA, USA

J. L. Batoz
Universite de Technologie Compiegne,
Compiegne, France

Z. P. Bažant
Northwestern University,
Evanston, IL, USA

M. P. Bendsoe
Technical University of Denmark,
Lyngby, Denmark

D. Beskos
University of Patras, Greece

G. F. Carey
University of Texas at Austin, USA

J. L. Chenot
ENSM de Paris, Valbonne, France

Y. K. Cheung
University of Hong Kong

R. W. Clough
University of California,
Richmond, CA, USA

G. Comini
Universita degli Studi di Udine, Italy

C. A. Felippa
University of Colorado, Boulder, USA

J. Fish
Rensselaer Polytechnic Institute, USA

P.-L. George
INRIA, Le Chesnay, France

M. Géradin
ISIS, JRC, Ispra, Italy

R. Haber
University of Illinois at
Urbana-Champaign, IL, USA

R. T. Haftka
Aerospace Eng, Mech & Eng Sci,
Gainesville, FL, USA

T. K. Hellen
Oakfield House, Bristol, UK

T. J. R. Hughes
University of Texas at Austin, USA

S. Idelsohn
Universidad Nacional del Litoral,
Argentina

M. Kleiber
Polish Academy of Sciences, Warsaw,
Poland

P. Le Tallec
Université Paris Dauphine and l'Ecole
Polytechnique, Palaiseau, France

X. K. Li
Dalian University of Technology,
People's Republic of China

W. K. Liu
Northwestern University,
Evanston, IL, USA

G. Maier
Polytechnic of Milan, Italy

H. A. Mang
Technische Universität Wien, Austria

K. Morgan
University College of Swansea, UK

Z. Mroz
Polish Academy of Sciences,
Warsaw, Poland

A. K. Noor
Old Dominion University,
Hampton, VA, USA

J. T. Oden
University of Texas at Austin, USA

R. Ohayon
CNAM, Paris, France

J. Oliver
Technical University of Catalonia,
Barcelona, Spain

E. Oñate
Universidad Politécnica de Catalunya,
Barcelona, Spain

M. Ortiz
California Institute of Technology,
Pasadena, CA, USA

K. C. Park
University of Colorado, Boulder, USA

D. Peric
University of Wales Swansea, UK

E. Ramm
Stuttgart University, Germany

J. N. Reddy
Texas A&M University,
College Station, TX, USA

K. Runesson
Chalmers University of Technology,
Göteborg, Sweden

S. Saigal
Carnegie Mellon University,
Pittsburgh, PA , USA

A. Samuelsson
Chalmers Tekniska Högskola,
Göteborg, Sweden

B. Schrefler
Universita di Padova, Italy

M. S. Shephard
Rensselaer Polytechnic Institute,
Troy, NY, USA

E. Stein
University of Hannover, Germany

R. L. Taylor
University of California, Berkeley, USA

N. P. Weatherill
University of Wales Swansea, UK

P. Wriggers
University of Hannover, Germany

G. Yagawa
University of Tokyo, Japan

Advisory Board

M. Ainsworth
University of Strathclyde,
Glasgow, UK

M. H. Aliabadi
Imperial College, UK

F. Armero
University of California, Berkeley, USA

F. Auricchio
Universitá di Pavia, Italy

D. J. Benson
University of California, San Diego, USA

M. A. Bradford
University of New South Wales,
Australia

J. S. Chen
University of California at Los Angeles
(UCLA), Los Angeles, USA

A. Combescure
LaMCos INSA de Lyon,
Villeurbanne, France

L. Franca
University of Colorado, Denver, USA

D. Givoli
Technion, Haifa, Israel

I. Harari
Tel Aviv University, Israel

A. Huerta
Universidad Politecnica de Catalunya,
Spain

G. M. Hulbert
The University of Michigan, USA

T. A. Laursen
Duke University, Durham,
NC, USA

J. Peraire
Massachusetts Inst of Technology, USA

C. Schwab
ETH Zuerich, Switzerland

O. Sigmund
Technical University of Denmark,
Lyngby, Denmark

P. Steinmann
Universität Kaiserslautern, Germany

K. K. Tamma
University of Minnesota, USA

E. Van der Giessen
University of Groningen, The Netherlands

L. C. Wrobel
Brunel University, UK

N. J. Zabaras
Cornell University, USA

International Journal for
Numerical Methods in Engineering

Volume 65 Number 1 • 1 January 2006

A quadratically convergent unstructured remeshing strategy for shape optimization: D. N. Wilke, S. Kok and A. A. Groenwold 1

An enhanced genetic algorithm for structural topology optimization: S. Y. Wang, K. Tai and M. Y. Wang 18

Non-linear finite element modal approach for the large amplitude free vibration of symmetric and unsymmetric composite plates: Y. Y. Lee, H. Y. Sun and J. N. Reddy 45

Three-dimensional quasi-static frictional contact by using second-order cone linear complementarity problem: Y. Kanno, J. A. C. Martins and A. Pinto da Costa 62

Normalized explicit approximate inverse preconditioning for solving 3D boundary value problems on uniprocessor and distributed systems: G. A. Gravvanis and K. M. Giannoutakis 84

Three-dimensional Coons macroelements: application to eigenvalue and scalar wave propagation problems: C. G. Provatidis 111

Micromechanical modelling of elastic continuum with virtual multi-dimensional internal bonds: Z. Zhennan and G. Xiurun 135

Volume 65 Number 2 • 8 January 2006

Non-linear finite element analysis of mechanical electrochemical phenomena in hydrated soft tissues based on triphasic theory: Y. Chen, X. Chen and T. Hisada 147

On the numerical modelling of quasi-static crack growth in linear elastic fracture mechanics: P. Heintz 174

Multiscale modelling of particle debonding in reinforced elastomers subjected to finite deformations: K. Matouš and P. H. Geubelle 190

On the effectiveness of variation in the physical variables on the steady MHD flow between parallel plates with heat transfer: H. A. Attia 224

Large deflection analysis of elastic space membranes: G. C. Tsiatas and J. T. Katsikadelis 236

Mathematical analysis and numerical study to free vibrations of annular plates using BIEM and BEM: J. T. Chen, S. Y. Lin, I. L. Chen and Y. T. Lee 264

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

IJNMBH 65 1–2292 (2006) • ISSN 0029-5981

Volume 65 Number 3 • 15 January 2006

High-order finite volume schemes on unstructured grids using moving least-squares reconstruction. Application to shallow water dynamics: L. Cueto-Felgueroso, I. Colominas, J. Fe, F. Navarrina and M. Casteleiro 295

Improved many-to-one sweeping: M. A. Scott, S. E. Benzley and S. J. Owen 332

A geometrically non-linear piezoelectric solid shell element based on a mixed multi-field variational formulation: S. Klinkel and W. Wagner 349

Finite element model for the coupled radiative transfer equation and diffusion approximation: T. Tarvainen, M. Vauhkonen, V. Kolehmainen and J. P. Kaipio 383

Applying multiple objective tabu search to continuous optimization problems with a simple neighbourhood strategy: A. Baykasoglu 406

The partition of unity finite element method for short wave acoustic propagation on non-uniform potential flows: P. Gamallo and R. J. Astley 425

Volume 65 Number 4 • 22 January 2006

The maximization of fundamental frequency of structures under arbitrary initial stress states: A. R. de Faria and S. F. M. de Almeida 445

Monolithic modelling of electro-mechanical coupling in micro-structures: V. Rochus, D. J. Rixen and J.-C. Golinval 461

MLS-based variable-node elements compatible with quadratic interpolation. Part I: Formulation and application for non-matching meshes: Y.-S. Cho and S. Im 494

MLS-based variable-node elements compatible with quadratic interpolation. Part II: Application for finite crack element: Y.-S. Cho and S. Im 517

Piecewise uniform bases and energetic approach for discrete constitutive matrices in electromagnetic problems: L. Codecasa and F. Trevisan 548

Efficient cubature formulae for MLPG and related methods: R. Pecher 566

Volume 65 Number 5 • 29 January 2006

State-space time integration with energy control and fourth-order accuracy for linear dynamic systems: S. Krenk 595

Analysis of singular stress fields at multi-material corners under thermal loading: C. Song 620

Use of equivalent mass method for free vibration analyses of a beam carrying multiple two-dof spring–mass systems with inertia effect of the helical springs considered: J.-J. Wu 653

A simplified canonical form algorithm with application to porous metal plasticity: M. A. Keavey 679

Boundary elements with equilibrium satisfaction—a consistent formulation for dynamic problems considering non-linear effects: D. Soares Jr, J. C. F. Telles and W. J. Mansur 701

Solution of flat crack problems in shear mode: Y. Z. Chen and X. Y. Lin 714

Efficient surface reconstruction from contours based on two-dimensional Delaunay triangulation: D. Wang, O. Hassan, K. Morgan and N. Weatherill 734

On 2D elliptic discontinuous Galerkin methods: S. J. Sherwin, R. M. Kirby, J. Peiró, R. L. Taylor and O. C. Zienkiewicz 752

Volume 65 Number 6 • 5 February 2006

A modified SSOR preconditioner for sparse symmetric indefinite linear systems of equations: X. Chen, K. C. Toh and K. K. Phoon 785

A simple hybrid stress element for shear deformable plates: S. de Miranda and F. Ubertini 808

The generalized Riemann problem method for the shallow water equations with bottom topography: J. Li and G. Chen 834

A new fast multipole boundary element method for solving large-scale two-dimensional elastostatic problems: Y. Liu 863

The probability density evolution method for dynamic response analysis of non-linear stochastic structures: J. Li and J.-B. Chen 882

An energy momentum conserving algorithm using the variational formulation of visco-plastic updates: L. Noels, L. Stainier and J.-P. Ponthot 904

Robust generation of high-quality unstructured meshes on realistic biomedical geometry: Y. Ito, P. C. Shum, A. M. Shih, B. K. Soni and K. Nakahashi 943

Erratum 974

Volume 65 Number 7 • 12 February 2006

A high-level programming-language implementation of topology optimization applied to steady-state Navier–Stokes flow: L. H. Olesen, F. Okkels and H. Bruus 975

Stress integration and mesh refinement for large deformation in geomechanics: M. Nazem, D. Sheng and J. P. Carter 1002

Extended Voronoi cell finite element model for multiple cohesive crack propagation in brittle materials: S. Li and S. Ghosh 1028

A Cauchy-stress based solution for a necking elastic constitutive model under large deformation: P. Olley 1068

A non-iterative algorithm based on Richardson's extrapolation. Application to groundwater flow modelling: F. G. Basombrío, L. Guarracino and M. J. Vénere 1088

On the modelling of complex 3D bulk metal forming processes via the pseudo-concentrations technique. Application to the simulation of the Mannesmann piercing process: D. A. Berazategui, M. A. Cavaliere, L. Montelatici and E. N. Dvorkin 1113

Numerical investigation of the stress field of particulate reinforced polymeric composites subjected to tension: P. A. Kakavas and D.-P. N. Kontoni 1145

Volume 65 Number 8 • 19 February 2006

Numerical studies on constrained venting system with reactive mufflers by GA optimization: L.-J. Yeh, Y.-C. Chang and M.-C. Chiu 1165

Algebraic multigrid methods for solving generalized eigenvalue problems: A. Borzì and G. Borzì 1186

Displacement-based formulations for composite beams with longitudinal slip and vertical uplift: F. Gara, G. Ranzi and G. Leoni 1197

Stochastic analysis of highly non-linear structures: W. Roux, N. Stander, F. Günther and H. Müllerschön 1221

Inverse geometry heat transfer problem based on a radial basis functions geometry representation: M. Gonzalez and M. B. Goldschmit 1243

A goal-oriented *hp*-adaptive finite element method with electromagnetic applications. Part I: Electrostatics: D. Pardo, L. Demkowicz, C. Torres-Verdín and L. Tabarovsky 1269

Boundary element-free method (BEFM) and its application to two-dimensional elasticity problems: K. M. Liew, Y. Cheng and S. Kitipornchai 1310

A flexibility-based finite element for linear analysis of arbitrarily curved arches: L. Molari and F. Ubertini 1333

Volume 65 Number 9 • 26 February 2006

Thermal stress evaluation in the steel continuous casting process: J. M. Risso, A. E. Huespe and A. Cardona 1355

The geometric stiffness of thick shell triangular finite elements for large rotations: R. Levy and E. Gal 1378

Improvement of the flow formulation by recovery of the hydrostatic pressure using the finite point method: H. Dalayeli, H. Hashemolhosseini, M. Farzin and B. Soltani 1403

Boundary elements for cracks and notches in three dimensions: J. O. Watson 1419

Numerical experiments with the Bloch–Floquet approach in homogenization: C. Conca, S. Natesan and M. Vanninathan 1444

Templatized refinement of triangle meshes using surface interpolation: Y. Su and A. S. Kumar 1472

Buckling of folded plate structures subjected to partial in-plane edge loads by the FSDT meshfree Galerkin method: K. M. Liew, L. X. Peng and S. Kitipornchai 1495

Performance of time-stepping schemes for discrete models in fracture dynamic analysis: A. Delaplace and A. Ibrahimbegovic 1527

Volume 65 Number 10 • 5 March 2006

Augmented canonical forms and factorization of graphs: A. Kaveh and M. A. Sayarinejad 1545

Analysis, design and optimization of structures using force method and genetic algorithm: A. Kaveh and H. Rahami 1570

Material cloud method for topology optimization: S.-Y. Chang and S.-K. Youn 1585

An energy-consistent material-point method for dynamic finite deformation plasticity: E. Love and D. L. Sulsky 1608

3D hybrid mesh generation for reservoir simulation: N. Flandrin, H. Borouchaki and C. Bennis 1639

Numerical simulation of fluid flow and temperature field in keyhole double-sided arc welding process on stainless steel: D. Honggang, G. Hongming and W. Lin 1673

Use of higher-order shape functions in the scaled boundary finite element method: T. H. Vu and A. J. Deeks 1688

A mathematical framework of the bridging scale method: S. Tang, T. Y. Hou and W. K. Liu 1714

Volume 65 Number 11 • 12 March 2006

Computer-aided simulation and testing of spatial linkages with joint mechanical errors: E. Pezzuti, R. Stefanelli, P. P. Valentini and L. Vita 1735

A finite element method for poro mechanical modelling of geotechnical problems using local second gradient models: F. Collin, R. Chambon and R. Charlier 1749

Efficient and accurate waveguide mode computation using BI-RME and Lanczos methods: V. M. García, A. Vidal, V. E. Boria and A. M. Vidal 1773

Buckling of core wall structures coupled with connecting beams: Q. Wang and L. Wang 1789

Planar four node piezoelectric elements with drilling degrees of freedom: C. S. Long, P. W. Loveday and A. A. Groenwold 1802

A variational formulation of constitutive models and updates in non-linear finite viscoelasticity: E. Fancello, J.-P. Ponthot and L. Stainier 1831

The method of fundamental solutions for inverse boundary value problems associated with the steady-state heat conduction in anisotropic media: B. Jin, Y. Zheng and L. Marin 1865

A moving superimposed finite element method for structural topology optimization: S. Wang and M. Y. Wang 1892

Volume 65 Number 12 • 19 March 2006

Sensitivities of flow and transport parameters in fractured porous media using automatic differentiation:T. Vogel, D. Bachmann, A. Hauschild, H. M. Bücker and J. Köngeter 1923

Localized Jacobian ILU preconditioners for hydraulic fractures: A. P. Peirce 1935

A generalized non-linear transformation for evaluating singular integrals: B. I. Yun 1947

A meshless method with enriched weight functions for three-dimensional crack propagation: M. Duflot 1970

The simple boundary element method for multiple cracks in functionally graded media governed by potential theory: a three-dimensional Galerkin approach:G. H. Paulino and A. Sutradhar 2007

Generalized pointwise bias error bounds for response surface approximations: T. Goel, R. T. Haftka, M. Papila and W. Shyy 2035

Radial basis functions and level set method for structural topology optimization: S. Wang and M. Y. Wang 2060

Two implementations of IRK integrators for real-time multibody dynamics: D. Dopico, U. Lugris, M. Gonzalez and J. Cuadrado 2091

Erratum 2112

Volume 65 Number 13 • 26 March 2006

Trefftz solutions for piezoelectricity by Lekhnitskii's formalism and boundary-collocation method: N. Sheng, K. Y. Sze and Y. K. Cheung 2113

Robust adaptive remeshing strategy for large deformation, transient impact simulations: T. Erhart, W. A. Wall and E. Ramm 2139

Local *maximum-entropy* approximation schemes: a seamless bridge between finite elements and meshfree methods: M. Arroyo and M. Ortiz 2167

A method for modal reanalysis of topological modifications of structures: Z. J. Yang, S. H. Chen and X. M. Wu 2203

Crush dynamics of square honeycomb sandwich cores: Z. Xue and J. W. Hutchinson 2221

A hybrid regularization method for inverse heat conduction problems: X. Ling, H. P. Cherukuri and M. F. Horstemeyer 2246

Free convection and radiation characteristics for a vertical plate embedded in a porous medium: I. A. Badruddin, Z. A. Zainal, P. A. A. Narayana, K. N. Seetharamu and L. W. Siew 2265

The development of hybrid axisymmetric elements based on the Hellinger–Reissner variational principle: C. S. Jog and R. Annabattula 2279

Erratum 2292
